

Washington State

This map has been drawn from a 1969 R.R. Donnelly road map of Washington State. Washington State is situated on the NW coast of the United States and is known for having one of the highest annual rainfalls of all the US States. The urban areas of Seattle and Tacoma dominated the region in the 1960s and 1970s through the airline company Boeing, although Microsoft are the new Industrial Giants of the state.

For this map, all Indian reservation hexes are considered impassable. The map is designed for 4 players - 2 start in Seattle, 1 in Tacoma and 1 in Spokane.
